

Does your business use Microsoft 365?

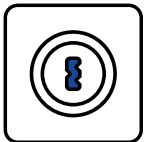

If the answer is yes, you'll have data that needs to be backed up, protected and instantly accessible.

Relying on native tooling for protection in Microsoft 365 often falls short of the requirements your business needs to avoid a disaster recovery scenario.

Switching to DSProtect for Microsoft 365 gives you the safeguards your business needs in under **30 minutes**, all from **\$1.60 per user per month**.

Two simple steps. Less than 30 minutes. Comprehensive Protection.

Step 1

Authenticate your Microsoft 365 global administrator account with DSProtect. This is a simple configuration via an online portal supplied by our partners at Rubrik.

Step 2

Log in to the portal and set your data protection SLAs for Microsoft 365 with our simple click and select options.

DSProtect – the simplest solution for Microsoft 365

Predictable low-cost model

Simple licensing model costs \$1.60 per user per month.
